

Omkar Jeetendra Kalekar

omkarkalekar2323@gmail.com | +1-667-345-4446 | [linkedin.com/in/omkar-kalekar](https://www.linkedin.com/in/omkar-kalekar) | Baltimore, MD, US (open to relocate anywhere in US)

SUMMARY

Project management professional skilled in developing project plans, timelines, and budgets, and coordinating cross-functional teams to deliver projects on time and within scope. Experienced in monitoring progress, managing risks, and maintaining transparent stakeholder communication. Proven ability to drive operational efficiency by tracking performance metrics and resolving project bottlenecks.

EDUCATION

University of Maryland Baltimore County

Master of Science in Information System

GPA: 3.8/4

Aug 2024 - May 2026

Baltimore, MD

Savitribai Phule Pune University

Bachelor of Engineering in Electronics and Telecommunications Engineering

GPA: 3.5/4.0

Jun 2019 - May 2023

Pune, India

PROFESSIONAL WORK EXPERIENCE

eSurgi

Project Management Fellow

Feb 2026 – May 2026

Remote, USA

- Partner directly with the CEO to track progress of ongoing projects, overseeing financial management and ensuring alignment with business goals and timely execution of deliverables.
- Coordinate cross-functional teams by assigning tasks, implementing project scheduling, monitoring progress, and collecting updates to ensure projects stay on schedule and within scope.
- Develop and maintain project schedules and budgets, identify risks and dependencies, and proactively drive resolution to meet deadlines.
- Facilitate communication across stakeholders by providing regular updates, ensuring transparency and alignment across teams.
- Analyze project execution data using Tableau to identify bottlenecks and recommend improvements, enhancing operational efficiency.
- Support data-driven decision-making by building detailed Excel reports that track key project metrics and deliver actionable insights to leadership.

Weatherford

Product Analyst

Jun 2023 – Jun 2024

Mumbai, India

- Collaborated with technical and business stakeholders to analyze data workflows and support improvements to enterprise analytics processes.
- Designed and executed complex **SQL queries to analyze large datasets**, enabling improved reporting accuracy and faster business insights.
- Developed dashboards using **Power BI and Excel**, improving reporting efficiency by **30%** and enabling better visibility into business metrics.
- Supported integration of data from multiple sources into centralized analytics environments, improving accessibility and consistency of enterprise data.
- Identified inefficiencies in legacy data processes and recommended improvements to streamline reporting and reduce manual data preparation.
- Partnered with cross-functional teams to ensure solutions aligned with business requirements and operational objectives.

TCR

Data Science Intern

Jan 2022 – Apr 2022

Remote

- Built machine learning pipelines using Python (Pandas, NumPy, Seaborn) and PySpark to analyze historical data and predict business outcomes.
- Created interactive dashboards in Power BI and Tableau to clearly present model results and complex data insights to stakeholders.
- Helped reduce data processing time by 20% through efficient modeling and visualization, supporting faster and more informed decision-making.
- Leveraged AI-assisted tools to accelerate data analysis, workflow optimization, and rapid prototyping of analytical solutions.

SKILLS & CERTIFICATIONS

Data Analysis & Visualization: Tableau, Power BI, MS Excel (Pivot Tables, Charts), WEKA, PySpark, Pandas, NumPy, Lucidchart.

Programming & Databases: Snowflake, T-SQL/SQL, Python, C++, PL/SQL, NoSQL, Data Modeling, Data Pipelines, Distributed Data Processing.

Machine Learning & AI: Scikit-learn, TensorFlow, supervised/unsupervised learning, predictive modeling, NLP basics, feature engineering

Project Management: Cross-functional teamwork, Resource Planning, KPI Development, Risk Management, SharePoint, Team Collaboration, Project Scheduling, Financial Management.

Certifications: Google Data Analytics, Data Visualization with Tableau (University of California, Davis), Agile Methodologies, Scrum Foundations

ACADEMIC PROJECTS

Real-Time Weather and Utility Monitoring Pipeline Using Kafka

Apr 2026

- Built an end-to-end real-time weather monitoring pipeline using OpenWeather API, Apache Kafka, PostgreSQL, and Docker to support utility risk monitoring and operational awareness.
- Developed Kafka producer-consumer architecture to stream, process, and store live Baltimore weather events with automated risk classification logic.
- Designed SQL analytics views and dashboard-ready datasets to analyze weather risk distribution, wind trends, temperature changes, and high-risk events.
- Created dashboard visualizations and GitHub documentation to demonstrate the full data engineering workflow from ingestion to reporting.

Tools: Apache Kafka, Python, SQL, PostgreSQL, Stream Processing

H1B Visa Application Outcome Prediction

May 2025

- Worked as data engineer to build a classification model using real-world Kaggle data to predict visa outcomes (Certified/Denied).
- Processed 50,000+ records, engineered features, and identified key influencers like wage and job title.
- Created and presented data visualizations to support findings.

Tools: Python, Pandas, Scikit-learn, Seaborn, Git LFS

Yoga Pose Detection System

May 2023

- Trained a computer vision model using 5,000+ images and video data for accurate yoga pose detection.
- Achieved a 95% accuracy in detecting and classifying yoga postures from live video feeds.
- Designed an interactive web application to provide real-time posture feedback, integrating computer vision and user engagement.

ADDITIONAL WORK EXPERIENCE

University of Maryland Baltimore County	July 2025 – May 2026
Events Lead (GEARS)	Baltimore, MD
- Led planning and execution of graduate student events by managing event schedules, budgets, and stakeholder communication across multiple teams. - Organized and managed events such as workshops, networking sessions, and research presentations, improving student engagement and participation. - Developed event strategies and promotional plans, incorporating resource planning to increase awareness and participation among graduate students.	
University of Maryland Baltimore County	Sept 2024 – May 2026
Math Tutor (Part-time)	Baltimore, MD
- Designed and implemented personalized session plans, utilizing effective teaching strategies to enhance middle school students' understanding of key mathematical concepts. - Fostered a collaborative learning environment by building strong relationships with students from diverse backgrounds and working with colleagues to develop strategic session frameworks.	

LEADERSHIP & EXTRACURRICULARS

President & Vice-President, E&TC Engineering Student Association (2021-2023) – Spearheaded technical workshops, networking events, and student-driven projects to enhance learning experiences.

Editor, College Magazine – Managed content creation, editing, and publication of institutional magazines, highlighting student and faculty achievements.
