SUMMARY

Product Specialist with 2+ years of experience supporting data-driven product decisions through reporting, dashboards, and trend analysis. Skilled in SQL and Excel-based analysis, summarizing findings for business cases, and communicating insights clearly to cross-functional teams. Curious, organized, and comfortable learning new tools and platforms quickly.

EDUCATION

University of Maryland Baltimore County — M.S. in Information Systems (GPA: 3.7/4.0)

Graduated: May 2026

Savitribai Phule Pune University — B.E. in Electronics and Telecommunications Engineering (GPA: 3.5/4.0)

Graduated: May 2023

SKILLS

Project Management: Agile Scrum, JIRA, Story Mapping, Risk Management, Budget Tracking, Cross-Functional Collaboration, Stakeholder Management, Client & Vendor Management, Project Scheduling, Resource Allocation, Process Documentation, Requirements Gathering.

Product Management: SDLC, PDLC, A/B Testing, Market & User Research, Business Requirement Documents, Technical Marketing, Product Lifecycle Support, Customer Issue Resolution, Market Research, Product Strategy.

Analysis & BI: Power BI, Tableau, Microsoft Excel, KPI Tracking, Microsoft Office, MS PowerPoint, Data Analysis, Data Driven Decision Making.

AI & Agentic Systems: Large Language Models, GenAI, AI assisted workflows, MCP Workflows, RAG Pipelines, Prompt Engineering.

Data & Databases: SQL/MySQL, PostgreSQL, MS SQL Server, Snowflake, SharePoint, Python, Data Mining & Analysis.

Cloud & Data Engineering: AWS (S3, Lambda, Glue, Athena), Databricks Lakehouse, Apache Spark, Delta Lake, Apache Kafka, Docker, Git, GitHub Actions (CI/CD).

CERTIFICATIONS

Data Visualization with Tableau · Cloud Computing · Atlassian Agile Methodologies & Scrum Foundations · Data-Driven Product Management

WORK EXPERIENCE

Product Manager — eSurgi | Remote, USA

Jan 2026 – May 2026

- Led customer discovery outreach to 50+ physical therapists, converting 5 into in-depth interviews on device usefulness and clinical fit.
- Contributed directly to investor pitch deck content alongside the CEO, shaping the GTM narrative through a full device launch.
- Converted PT feedback into structured product requirements and use cases for engineering and investors.
- Built adoption and milestone dashboards that improved stakeholder visibility by 15%.

Events Lead — GEARS, UMBC | Baltimore, MD

Aug 2025 – May 2026

- Grew student engagement 20–30% by planning and executing cross-department events.
- Led planning and execution of graduate student events, managing schedules, budgets, and stakeholder communication.
- Organized workshops, networking sessions, and research presentation events, including a full symposium.

Product Analyst — Weatherford | Mumbai, India

Jun 2023 – Jun 2024

- Built and maintained 15+ Power BI and Excel dashboards, improving reporting efficiency by 30%.
- Identified a recurring failure pattern across 20+ clients using SQL and dashboarding, feeding findings back to the product team.
- Resolved ~10 client support tickets weekly on CygNet, the SCADA platform used across oil well operations.

Associate Product Analyst — TCR | Remote, India

Jan 2022 – Jan 2023

- Conducted competitive analysis across 5–10 competitor products per project, delivering actionable recommendations to the product team.
- Analyzed market trends and competitor positioning to inform feature and roadmap discussions.
- Presented market and competitive research findings to stakeholders.

PROJECTS

Cloud FinOps Intelligence Platform | AWS, Python, Athena, Glue, Lambda, Streamlit

- Identified \$420K+ in potential savings by architecting a serverless, API-driven data platform analyzing \$2.1M+ in cloud spend across 1,000+ resources.
- Architected a serverless, event-driven FinOps platform that automated cost analytics and executive reporting, replacing manual spend tracking.
- Automated data ingestion and transformation into analytics-ready datasets via S3 Event Notifications and Glue ETL, cutting reporting turnaround.
- Shipped reliably by implementing CI/CD with GitHub Actions, catching regressions before they reached production.

Student Success Intelligence Platform | Databricks Lakehouse, Apache Spark, Delta Lake, Python

- Engineered scalable analytics pipelines processing 7.5M+ LMS events and 1.3M+ student activity records to improve institutional visibility.
- Developed executive dashboards and semantic data models supporting KPI tracking, engagement monitoring, and operational decision-making.
- Built reusable data workflows that enabled scalable reporting across academic stakeholders.

AI Event Planning & Engagement System | Scikit-learn, TextBlob, SQLite, Plotly, Pandas, GitHub, Streamlit Cloud

- Owned product scope and roadmap end to end, shipping an AI-powered product with a fallback mode ensuring reliability when the underlying API was unavailable.
- Built an attendance-prediction model ($R^2 = 0.83$, validated against baseline models) and caught and fixed a data leakage bug before shipping.
- Designed AI content generation with a fallback mode to maintain reliability, demonstrating direct reasoning about AI system risk, safety, and operational considerations.

LEADERSHIP

President & Vice-President, E&TC Engineering Student Association (2021–2023)

- Led technical workshops, managed content development, and coordinated communications across student and faculty groups.
