SUMMARY

Data Engineer with experience designing cloud-native data platforms, building scalable ETL pipelines, and developing machine learning solutions that transform large-scale datasets into actionable insights. Proven ability to build reliable data workflows, develop statistical and predictive models, and collaborate with cross-functional stakeholders to deliver analytics solutions supporting operational decision-making.

EDUCATION

University of Maryland Baltimore County - Master of Science in Information System

May 2026

Savitribai Phule Pune University - Bachelor of Engineering in Electronics and Telecommunications Engineering

May 2023

SKILLS & CERTIFICATIONS

Data Engineering: Apache Kafka, PySpark, Data Pipelines, ETL, Stream Processing, Data Modeling, Distributed Data Processing, ETL Pipelines.

Cloud: AWS S3, Lambda, Glue, Athena, GitHub Actions

AI & Machine Learning: Large Language Models, TensorFlow, Generative AI, Model Evaluation, Responsible AI, GenAI, ML, LLM architectures, prompt design, RAG pipelines, multi-agent orchestration, cloud AI platforms.

Project/Product Management: Agile Scrum, JIRA, Software Development Life Cycle (SDLC), Product Development Life Cycle (PDLC), People Management, Product Backlog Management, Cross-Functional Collaboration, Stakeholder Management, Client Management, Business Process Model and Notation, Business Requirement Document.

Business Intelligence & Power Platforms : Power BI, Tableau, Microsoft Excel, PowerApps, Power Automate,, Revenue Analytics, MS PowerPoint

Database Management : SQL/MySQL, PostgreSQL, MS SQL Server, Spark SQL, Azure Data Studio, Snowflake, SharePoint

Programming Languages: Python, C++, Java, PL/SQL, Spark SQL.

Certifications: Google Data Analytics, Data Visualization with Tableau (UC Davis), Atlassian Agile Methodologies and Scrum Foundations.

PROFESSIONAL WORK EXPERIENCE

Project Management Fellow – eSurgi | Remote, USA

Jan 2026 – May 2026

- Improved executive visibility 15% by tracking project KPIs, milestones, risks, and dependencies for leadership decision-making.
- Maintained on-time project execution by coordinating cross-functional teams, deliverables, and project schedules.
- Enhanced stakeholder communication by facilitating regular project updates and documenting project status across teams.
- Reduced delivery risks 20% through structured risk management identifying bottlenecks, and recommending process improvements.

Events Lead - GEARS, UMBC | Baltimore, MD

Aug 2025 – May 2026

- Increased student engagement 20–30% by planning and executing events across university departments and organizations.
- Streamlined program execution by managing timelines, logistics, communications, and stakeholder coordination for multiple initiatives.
- Enhanced outreach effectiveness by tracking participation metrics and developing promotional strategies.

Product Analyst – Weatherford | Mumbai, India

Jun 2023 – Jun 2026

- Improved reporting efficiency 30% by developing 15+ Power BI and Excel dashboards using SQL-driven product analytics.
- Accelerated customer issue resolution by analyzing product data with SQL and translating business requirements into solutions for engineering teams.
- Improved analytics accessibility by integrating data from multiple sources into centralized reporting workflows.
- Influenced product improvements by identifying historical usage trends and communicating data-driven recommendations to cross-functional stakeholders.
- Strengthened stakeholder alignment by serving as the technical liaison between customers, business teams, and engineering throughout issue investigation.

Data Science Intern - TCR | Remote, India

Jan 2022 – Apr 2022

- Reduced data processing time 20% by building Python-based machine learning pipelines for business analytics.
- Improved decision-making by developing interactive Power BI and Tableau dashboards from predictive model outputs.
- Validated business insights by performing hypothesis-driven data analysis using Python, Pandas, and NumPy.

PROJECTS

Cloud FinOps Intelligence Platform | AWS, Python, Athena, Glue, Lambda, Streamlit

- Automated cloud cost analytics by architecting a serverless AWS pipeline across 1,000+ cloud resources.
- Built event-driven ETL workflows using Amazon S3, Lambda, Glue Crawlers, and Glue ETL to generate analytics-ready datasets.
- Identified \$420K+ potential cloud waste by developing Streamlit dashboards analyzing \$2.1M+ cloud spend and forecasting optimization opportunities.
- Automated end-to-end data ingestion using Amazon S3 Event Notifications, AWS Lambda, AWS Glue Crawlers, and AWS Glue ETL, enabling reliable and scalable analytics workflows.

Student Success Intelligence Platform | Databricks Lakehouse, Apache Spark, Delta Lake, Python

- Designed and developed an enterprise learning analytics platform using the Databricks Lakehouse and a Medallion architecture, integrating academic, enrollment, attendance, and Blackboard LMS data into a unified analytics environment.
- Engineered scalable ETL pipelines processing 1.3M+ student activity records, 147K+ enrollment records, and 7.5M Blackboard LMS events, creating analytics-ready datasets for institutional reporting.
- Developed 13+ reusable Gold semantic views and 3 interactive Databricks Lakeview dashboards delivering executive KPIs, student engagement analytics, department benchmarking, and course performance insights.

AI Event Planning & Engagement System | Scikit-learn, TextBlob, SQLite, Plotly, Pandas, GitHub, Streamlit Cloud

- Built and deployed an AI-powered event planning platform using Python and Streamlit, following Agile sprints to iterate on features aligned with stakeholder requirements
- Achieved $R^2 = 0.701$ by developing an attendance prediction model using historical event and budget data.
- Reduced prediction error to RMSE 72.36 and MAE 56.71 through feature engineering and model optimization.
- Delivered self-service analytics by integrating Streamlit dashboards, SQLite storage, and AI-generated planning workflows.

LEADERSHIP & CAMPUS INVOLVEMENT

President & Vice-President, E&TC Engineering Student Association (2021-2023)

- Increased student engagement by leading technical workshops, networking events, and student-driven initiatives across the department.
- Enhanced visibility of student and faculty achievements by managing content development, editing and publication of institutional magazine.
