## Summary

Product analyst who builds the data systems behind the decisions. I turn stakeholder and user feedback into requirements engineering teams can build against, then build the data quality and governance layer that keeps those decisions trustworthy. M.S. in Information Systems, 2+ years across product analytics, project management, and data governance in regulated, technical environments.

## Education

|                                                                                                              |                     |
|--------------------------------------------------------------------------------------------------------------|---------------------|
| <b>M.S. Information Systems — University of Maryland Baltimore County, GPA 3.7/4.0</b>                       | Graduated: May 2026 |
| <b>B.E. Electronics &amp; Telecommunications Engineering — Savitribai Phule Pune University, GPA 3.5/4.0</b> | Graduated: May 2023 |

## Work Experience

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                            |
