omkarkalekar2323@gmail.com, +1 667 345 4446, Baltimore, MD (open to relocate anywhere in US) [linkedin.com/in/omkarkalekar](https://www.linkedin.com/in/omkarkalekar), [Portfolio](#)

SUMMARY

Project Manager with 2+ years of experience managing project scope, schedule, and budget across regulated industries, from industrial energy operations to medical device development. Skilled in stakeholder coordination, financial tracking, and Tableau/Power BI-driven reporting, with a track record of keeping cross-functional teams aligned on timelines and deliverables.

EDUCATION

University of Maryland Baltimore County — M.S. in Information Systems (GPA: 3.7/4.0)

Graduated: May 2026

Savitribai Phule Pune University — B.E. in Electronics and Telecommunications Engineering (GPA: 3.5/4.0)

Graduated: May 2023

SKILLS

Project Management: Agile Scrum, JIRA, Story Mapping, Product Vision & Roadmapping, Backlog Management, Cross-Functional Collaboration, Stakeholder Management, Client & Vendor Management, Program/Project Scheduling, Industrial Energy Operations.

Product Management: SDLC, PDLC, A/B Testing, Market & User Research, Business Requirement Documents, Technical Marketing, Product Launch Support, Customer Issue Resolution.

BI & Power Platforms: Power BI, Tableau, Microsoft Excel, PowerApps, Power Automate, MS PowerPoint, Data Analysis.

Data & Databases: SQL/MySQL, PostgreSQL, MS SQL Server, Snowflake, SharePoint, Python, Data Mining & Analysis.

CERTIFICATIONS

Data Visualization with Tableau · Cloud Computing · Atlassian Agile Methodologies & Scrum Foundations

WORK EXPERIENCE

Project Manager— eSurgi | Remote, USA

Jan 2026 – May 2026

- Coordinated program timelines across engineering, clinical, and leadership teams through a full device launch, tracking dependencies to go-to-market readiness.
- Identified project performance issues early and escalated concerns to leadership, reducing delivery risk 20%.
- Developed project schedules and requirements documentation, adjusting scope as stakeholder needs evolved.
- Improved program visibility 15% by building Tableau and Excel dashboards to track milestones, budget, and risk.

Events Lead — GEARS, UMBC | Baltimore, MD

Aug 2025 – May 2026

- Managed project budgets and reported variances to stakeholders while coordinating logistics across multiple concurrent initiatives.
- Grew engagement 20–30% by planning and executing cross-department programs on schedule.

Product Analyst — Weatherford | Mumbai, India

Jun 2023 – Jun 2024

- Served as the liaison between 20+ clients and engineering teams on CygNet, a SCADA platform used across regulated industrial field operations.
- Diagnosed and resolved 10+ client-reported issues weekly, tracking performance patterns to prevent recurrence.
- Improved reporting efficiency 30% by building and maintaining 15+ Power BI and Excel dashboards for project and operations teams.

Data Science Intern — TCR | Remote, India

Jan 2022 – Apr 2022

- Reduced data processing time 20% by transforming 10,000+ records using PySpark, Pandas, and NumPy.
- Enhanced predictive model performance by implementing XGBoost algorithms and evaluating model accuracy and robustness.

PROJECTS

Cloud FinOps Intelligence Platform | AWS, Python, Athena, Glue, Lambda, Streamlit

- Architected and deployed a serverless Cloud FinOps Intelligence Platform using AWS S3, Lambda, Glue, Athena, and Streamlit to automate cloud cost analytics, optimization, and executive reporting across 1,000+ cloud resources.
- Built an event-driven data pipeline leveraging Amazon S3 Event Notifications, AWS Lambda, AWS Glue Crawlers, and AWS Glue ETL to automate data ingestion, metadata refresh, and transformation into analytics-ready Parquet datasets.
- Developed FinOps analytics dashboards and forecasting models that analyzed \$2.1M+ in cloud spend, identified \$420K+ in potential waste, and generated \$278K+ in estimated savings opportunities through resource utilization and cost-efficiency analysis.
- Implemented CI/CD pipelines with GitHub Actions and version-controlled deployments to automate testing and shipping of code to production.

Student Success Intelligence Platform | Databricks Lakehouse, Apache Spark, Delta Lake, Python

- Engineered scalable analytics pipelines processing 7.5M+ LMS events and 1.3M+ student activity records to improve institutional visibility.
- Developed executive dashboards and semantic data models supporting KPI tracking, engagement monitoring, and operational decision-making.
- Built reusable data workflows that enabled scalable reporting across academic stakeholders.

AI Event Planning & Engagement System | Scikit-learn, TextBlob, SQLite, Plotly, Pandas, GitHub, Streamlit Cloud

- Owned product scope and roadmap for an event planning tool combining ML, AI content generation, and analytics, shipped and live on Streamlit Cloud.
- Built and validated an attendance prediction model ($R^2 = 0.83$) against baseline models rather than reporting the metric alone.
- Designed AI content generation with a fallback mode, keeping the product fully functional when the API is unavailable.

LEADERSHIP

President & Vice-President, E&TC Engineering Student Association (2021–2023)

- Increased student engagement by leading technical workshops, networking events, and student-driven initiatives.
